Europe's largest provider of fabric based event & marketing point of sale

Welcome to Northern Flags. We are the UK arm of Faber Vlaggen, Europe's largest advertising and events textile producers. From our Leeds based office we can deliver the best value and quality for our clients, utilising specialist digital and high volume screen printing solutions with unrivalled colour accuracy. We have Faber owned production facilities across Europe and in the Far East so we control the whole supply chain for our clients. This ensures that alongside our stock holding and "just in time" distribution facility we deliver great products, on time, across Europe.

This mini-brochure is designed to highlight some of our core products, whatever you require our specialist fabrics team are available for advice, quotations and details of current specification. We are happy to arrange tours of our production facilities and can also offer a design and visualisation service. We look forward to having the opportunity to work with you, be it for one flag, a major sporting event or point-of-sale campaigns.

A handwritten signature in black ink, appearing to read "Iain Clasper-Cotte", with a circled number "2" next to it.

# Feather Flags:

Aventos - The strongest feather flag system - Aluminium durable click frame.  
We are Europe's largest provider of feather flags.

Lightweight for indoor and outdoor use. The system is durable with a heavy duty elasticated sleeve, excellent print quality and aluminium click together frame system.

## Recommended Materials:

**Knitted Polyester** - Lightweight, durable, excellent show through and high quality image reproduction

**Polystretch** - For exposed use, elongated holes reduce wind resistance for exposed sites. Best used for less detailed artwork.

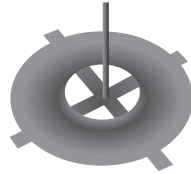

# Feather Flags:

Aventos - bases and accessories - ultimate flexibility

**Cross Base**

Perfect for indoor use

**Water Filled Tube 7kg**

Adds stability, easy transportation

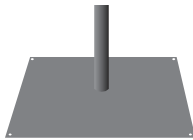

**Ground Screw 60cm**

Suitable for softer ground conditions

**Car Base Plate**

Ideal for car forecourts

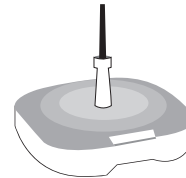

**5mm Steel Plate 40x40cm**

Indoor and outdoor fixing

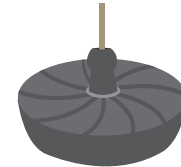

**Carry Case**

Pockets for transporting flag, poles and spike

**Water Stand**

Indoor or outdoor for flags up to 3.2m

**Water/Sand Filled 30/50kg**

Indoor or outdoor for flags up to 5.1m

**Standard Steel Pin 40cm**

Ideal for soft outdoor ground

**Concrete Stand - 38kg**

Forecourt and semi permanent use

# Flags & Fabric:

## Point of sale hangings

Any size or finish available for use with traditional poles, post systems, fixed displays and portable systems.

**Digital** - Capable of recreating full colour, stunning designs with a shorter turnaround time than screen printing. Ideal for smaller volumes.

**Screen** - The most cost effective method of producing large quantities whilst retaining the highest levels of print quality.

**Appliqued** - Incorporating traditional high quality hand finished production methods, club crests, corporate, custom and national designs available.

## Recommended Materials:

**Knitted Polyester** - Durable and cost effective can be digitally and screen printed.

**Woven Polyester** - Preferred by many as the traditional flag material. Stronger than knitted polyester, can be applied as well as digitally and screen printed.

**Polystretch** - For exposed use, elongated holes reduce wind resistance. Best used for less detailed artwork.

# Flag Poles:

For sale, installation, maintenance or event hire

We can supply poles for any type of use, from 20m poles to our Budget Construction range. We also supply portable systems for Events and Forecourts. Full advisory and installation service available.

**Architectural** - Aluminium tube tapered to create a smooth elegant profile in various grades and almost any height option. Highly durable.

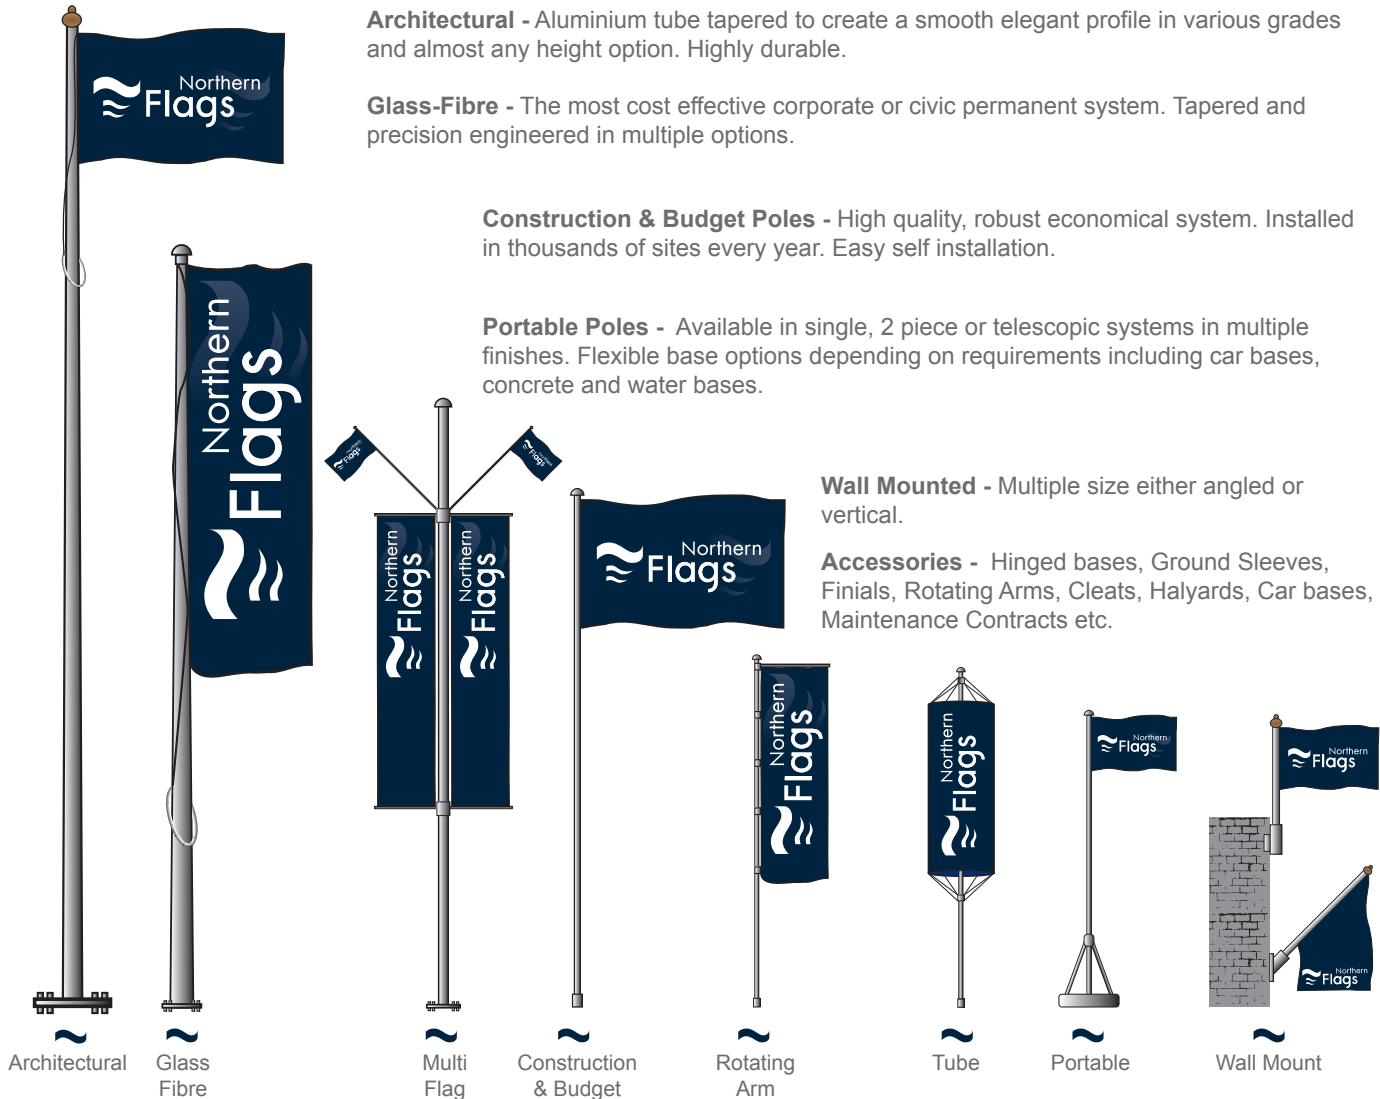

**Glass-Fibre** - The most cost effective corporate or civic permanent system. Tapered and precision engineered in multiple options.

**Construction & Budget Poles** - High quality, robust economical system. Installed in thousands of sites every year. Easy self installation.

**Portable Poles** - Available in single, 2 piece or telescopic systems in multiple finishes. Flexible base options depending on requirements including car bases, concrete and water bases.

**Wall Mounted** - Multiple size either angled or vertical.

**Accessories** - Hinged bases, Ground Sleeves, Finials, Rotating Arms, Cleats, Halyards, Car bases, Maintenance Contracts etc.

# Handwaving Flags:

A flag for everyone

Highly visual, cost effective and fun way of getting your audience involved with your brand. Perfect as giveaways to create atmosphere and spread your message. Various sizes and finishes available.

## Recommended Materials:

**Paper** - Can have the same or different images printed on both sides.

**Polythene** - Better suited for wet weather use outdoors. Single sided print with mirror image on reverse.

**Knitted Polyester** - Lightweight, durable, excellent show through and high quality image reproduction.

# Promotional Bunting:

A highly visual and exciting promotional tool, it is one of the most effective ways to promote your brand to the masses. Catching the eye of your audience couldn't be easier with different shapes and sizes to suit your message.

## Recommended Materials:

**Paper** - The most cost effective option for high quality images, indoor use only.

**PVC Film** - Very lightweight suitable for indoors and outdoors.

**Knitted Polyester** - Tactile feeling material, single sided print with mirror image on reverse.

# Gazebos:

## Fully branded instant shelters

Easy to assemble with a choice of strong yet light aluminium frames, available in 3x3m, 6x3m and hexagonal shape. All panels and roof sections can be fully personalised. Each Gazebo comes with storage bag for easy transportation.

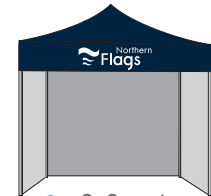

We can also offer bespoke structures and inflatables, contact our sales team for details.

~ 6x6 meter

~ Hexagonal

~ 3x3 meter

## Recommended Materials:

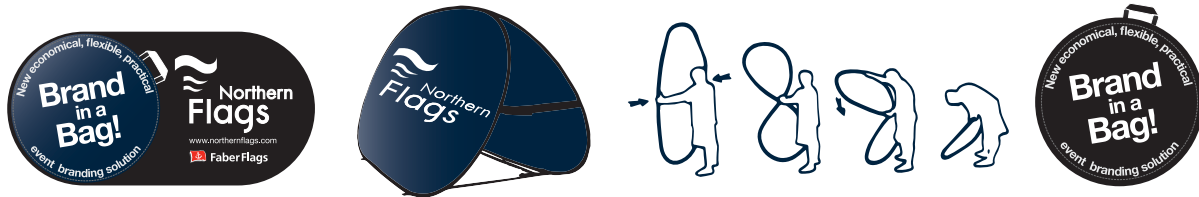

**Knitted Polyester** - Thick and durable, cost effective material with high quality image reproduction.

**PVC** - Heavy duty, welded, industrial strength material for daily professional use.

**Close Mesh Polyester** - Durable and lightweight.

# Pop Out Banners:

## Innovative instant self-erecting system

Faber designed and produced featuring 250gsm Jet banner for photo like printing. Five cross bars maximising stability. Twist and fold for portability in a flat round case. Available in 2 different sizes (2m x 1m) & (1.4m x 0.7m)  
*Expanded range launching soon*

## Recommended Materials:

**Jet Banner** - Tactile high quality feel material. Matt finish ideal for photography and eliminating reflection from lights.

# PVC Banners:

## The traditional display solution

These cost effective long lasting promotional banners are easy to install and change with each new promotion. Available with a choice of sizes and finishes. Can be finished on both sides if required.

### Recommended Materials:

**Heavy Duty** - Strong and durable 800gsm commercial grade thickness.

**Medium** - Lighter and more cost effective than heavy duty, made from 450gsm.

**PVC Mesh** - 330gsm thickness with small holes to reduce wind load, retains excellent graphic reproduction when viewed from a distance.

# HDPE:

## 100% recyclable banner material

Any events wishing to retain their green credentials should consider this alternative, benefiting from water based latex inks and a distinctive textured finish. Easier to use due to its lighter weight, it provides the performance and strength equivalent of 440g PVC from a 180g material.

# Roller Banners and Exhibition Units:

Make your promotion stand out with high quality banners or exhibition kits that simply roll up from robust, heavy duty, designer cartridges or fix to pop up stands. Padded carry case included for easy transportation with a choice of sizes.

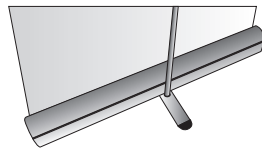

## Recommended Materials:

**Jet Banner** - Tactile, high quality feel material which projects a more premium image for your brand than rival PVC systems. Matt finish ideal for photography and eliminating reflection from lights.

**PVC** - Cost effective and durable way to get your message across.

~ Compact Carry Case

~ Rigid Supports

~ Fully Retractable

## Building Wraps:

Banners made to any size

We can offer all the benefits of our regular sized banners in a size and shape unique to your requirements up to full building wraps, experienced in delivering city dressing programmes. We can also offer a professional dedicated installation team.

## Recommended Materials:

**PVC Mesh** - 300gsm thickness with small holes to reduce wind load, retains excellent graphic reproduction when viewed from a distance.

**Polystretch** - For exposed use, elongated holes reduce wind resistance. Best used for less detailed artwork.

# Banner Systems:

A system to suit every purpose

## ~ Post Mounted

Designed to keep the banner taut even in high winds. Mid post mounting together with lightweight and heavy duty versions available.

## ~ Mast Systems

For permanent applications with heavy duty stainless steel construction, can be coated to any RAL colour. Single or twin arm versions available in a range of heights from 4-7m.

## ~ Wall Mounted

Flush to the wall and 90° mounting options made with steel brackets and aluminium bars. Lightweight and heavy duty versions available. Banners can be easily changed with the adjustable tension system.

# Banner Frames:

## ~ Lightweight

Easy to transport, quick assembly

## ~ Heavy Duty

For long term outdoor use

## ~ Double Sided

Boosts visibility from all angles

# Continuous Length Banner Roll:

Maximise brand impact and add atmosphere to large scale events. Easily fastens to perimeter fences with cable ties.

## Recommended Materials:

**Polystretch** - For exposed use, elongated holes reduce wind load. Best used for less detailed artwork.

**Non Woven** - Cost effective with image only shown on one side, ideal for single season use in a less demanding environment.

# Barrier Jackets:

Slides over the top of crowd barriers, perfect for easily getting your brand message across and creating an atmosphere at large scale events. Available in a variety of sizes and finishes.

## Recommended Materials:

**Polystretch** - For exposed use, elongated holes reduce wind load. Best used for less detailed artwork.

**Knitted Polyester** - Lightweight, durable, excellent show through and high quality image reproduction.

**Non Woven** - Cost effective with image only shown on one side, ideal for single season use in a less demanding environment.

# Parasols:

## External brand reinforcement

Available in a range of sizes, in either a traditional 8 panel circular design or a more modern square shape. Choice of fixed or adjustable height, strong aluminium poles.

## Recommended Materials:

**Jet Banner** - Tactile high quality feel material. Matt finish, ideal for photography and eliminating reflection from lights.

**Raytex** - Various options dependent on client requirements.

# Café Barriers:

## Maximum visibility for restaurants and coffee shops

A mixture of stainless steel and aluminium components make up the easy to assemble insert and lock design. Approved and recommended by many local councils, these barriers are perfect for cafés and bar terraces.

## Recommended Materials:

**PVC** - Cost effective and durable material. Best suited for long lasting promotions.

**PVC Mesh** - Small holes reduce weight and allow wind to pass through, reducing the load on the barrier frame. Retains excellent graphic reproduction when viewed from a distance.

**Canvas** - Long lasting, high quality tactile material.

# Internal Fabric Displays:

## Hanging and clip stretch displays

Bring any display to life, ideal for window dressing, shop walls and behind the counter. Gives a more premium feel to products than paper or card based POS. Can be hung with a wooden baton or with a custom clip in frame system.

## Recommended Materials:

**Knitted Polyester** - Lightweight, durable and cost effective with high quality image reproduction.

**Jet Banner** - Tactile, high quality feel material. Matt finish, ideal for photography and eliminating reflection from indoor lights.

**Satinette** - Smooth, silky, gloss finish for reproducing bright, high quality images.

# Personalised Furniture:

## Functional branded furniture

Eye catching, modern designed range of fully branded furniture, our range includes bean bags, foot stools, tables and sofas. Perfect for reception areas, shoe shops, salons and exhibitions.

~ Bean Bag

~ Deck Chair

~ Bench

~ Chair

~ Foot Stool
