

0.6M FLEXi LUXE DISPLAY STAND
Hardware - 64 x 228 x 25cm

Setting up your artwork.

Layout -

Open this PDF in Adobe Illustrator and place your artwork in the designated 'Artwork Here' layer of this document. When setting up your artwork please ensure that all text and logos are inside the white key line (Safe Area Layer) on the template, any background colour should extend to the outer edge of the grey background (Bleed) on the template. The magenta dashed line is the cut line.

Please Duplicate Artboard if there is a different image on Side B.

Text & Images -

Please ensure that when saving files, all text is outlined and any images are embedded. Any images need to meet certain DPI sizes to ensure a good quality print. Images need to be a minimum of 75 dpi at print size. This template is at tenth size so the dpi needs to be 750 dpi.

Please provide us with any Pantone references in order for us to achieve the closest match to your brand colours. Please be aware that slight colour variations may occur in the printing process.

File Formats -

All final artwork should be cmyk and preferred file format is print ready PDF file, but artwork can be supplied as ai files.
