## COVID-19 Solutions

Preparing to Reopen edition

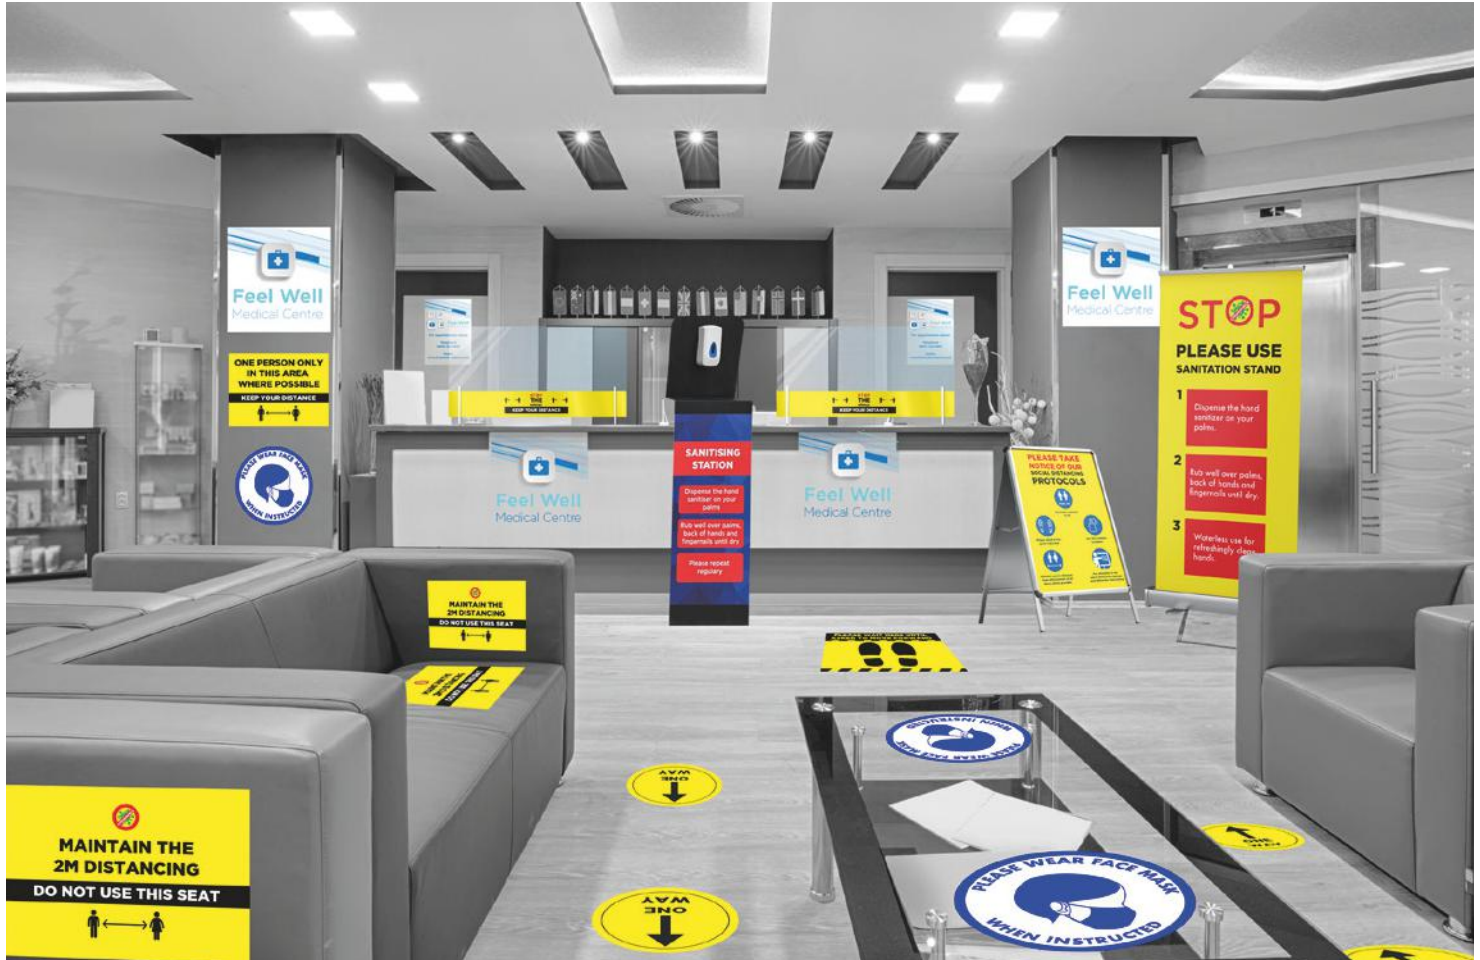

# OUTSIDE SIGNAGE

Before entering the surgery, it's important that patients and visitors are aware of social distancing protocols. Display clear and informative messaging on a range of print solutions.

# RECEPTION & WAITING AREA

Be aware of where patients and staff are likely to come into closer proximity with one another. Reinforce precautions with simple signage, and provide safety measures such as protective screens and sanitiser stations.

# TREATMENT ROOM

Protecting both patients and medical staff is paramount, especially in treatment rooms. This can be done using signage, screens, sanitiser stations and also PPE equipment such as face shields and face masks.
